# Rough

**600x300x4 mm**

Skanfordas Rough 600x300x4 small-formatted façade panels are an economical, durable, and environmentally friendly solution for all types of façades – also suitable for building renovation projects.

These modern fiber cement slates are provided with an opaque water-based acrylate coating and have a specially developed, vibrant, granular surface that is easier to keep clean. The sawn, paint-coated edges allow for high-precision installation. They thus meet all the requirements for contemporary design.

Skanfordas Rough 600x300x4 are available in an extremely wide range of colors so that there are virtually no limits to your design choices, that will always make your project look special.
