

SKANFAS STRUCTURE DESIGN

Skanfas Structure is a facade board with velvety full-bodied colored surface. Its specially developed structure keeps the board clean for a long time and rain water washes away all the dirt which accumulates on the surface.

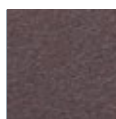

In addition to standard colors Skanfas Structure boards are now available in new design colors: Corten Steel, Old Copper and Black Iron. Cembrit Structure boards in new colors have the same outstanding features that help them remain clean and sophisticated looking.

TECHNICAL INFORMATION
